

Technical Data

ZOXU875M

Cook-In Casing

CHARACTERISTICS

Description

ZOXU875M is a biodegradable plastic casing with a high barrier to oxygen and water vapor, specifically designed for in-mold cooking applications.

It is characterized by having excellent stability, mechanical resistance, and has a very good transparency. Polymers of the highest quality, approved for contact with food, are used for the manufacture of the bag.

Product Benefits

ZOXU875M offers a variety of benefits, including:

- Biodegradation in garbage dumps
- Medium oxygen and water vapor barrier
- Excellent diameter control
- Inner layer with excellent protein adherence
- Talc-free (starch)
- Chlorine free

Applications

The Cook-In Casings can be used in various applications, being the most used in:

- Sausages and ham in general

Flat Width

Minimum of 3.5" (89mm) and a maximum of 12" (304mm).

Length

- Roll: 500 y 1080 m [± 20 m]
- Stick: 50 a 150 shirred m [+2 m]
- Pieces: 12" a 34" [+ 1"]

Printing

Can be printed:

- Up to 8 inks at the back
- Up to 8 inks at the front

Available Colors

- Clear
- Translucent red

PROPERTIES

ZOXU875M indicates its general data and properties in the following table. The product has available configurations. Please contact a Zubex advisor at the information provided at the end of the document.

Physical-Mechanical Properties

Parameter	Unit	Value	Method
Thickness	µm	44.4 +/- 6	Own Method (ASC-I-02)
	Mil.	1.75 +/- 0.20	
Longitudinal Shrinkage	%	10 +/- 2	Own Method (ASC-I-03)
Cross Shrinkage	%	10 +/- 2	Own Method (ASC-I-03)
Flat Width Tolerance	%	+/- 1/8"	-
Length Tolerance	%	+ 1"	-
Water Vapor Transmission Rate	g /100 in ² /day	2.2	ASTM-F-1249-13 (37.8°C (73°F) at 0% HR)
Oxygen Transmission Rate	cm ³ /100in ² /day	0.9	ASTM-D-3985-17 (23°C (73°F) at 0% HR)
Biodegradation	%	100	%

ESPECIFICACIONES

Usage Restrictions

- It's required to contact the advisor in case of attempting another application that the ones described.
- Casings are not suitable for heating in microwave ovens.
- The casings cannot be used as a toy.
- The casings are not suitable for pasteurization and sterilization.
- Heat treatment time and temperature. (water, steam: 80°C, max 30s)
- Casings are not suitable for consumption

Storage Conditions

- Store in the original packaging
- Storage place must be dry, clean and cool
- Storage temperature below 40°C, moisture free.
- Casings should be stored away from high temperature sources, as well as direct sunlight.

Shelf Life

The product after its delivery date in physical-mechanical properties has a useful life of 6 months.

Guarantee

The guarantee is mandatory as long as the customer follows the general recommendations and particularities described above.

NOTES

REVIEW 01. december 2021

The document is valid for the date indicated above and will be renewed when there are substantial changes in the composition or production that produce changes in the migration of the materials or articles. It will also be renewed when new regulations or new scientific data become available and a new conformity check is made.

We inform you that the performance of the casings is strictly connected with the packaging technology, type of packaged products and thermal processing technology applied by the customer. The typical data described above in specific applications may be subject to change.
